

Supervisor Insight

Browser Based Reporting

Improve operational efficiency by reporting

Reporting options available by:

- Transaction data
- Cardholder data
- Cost centre data
- Device usage
- Autoloader cash and card status

Supervisor Insight

Browser Based Reporting

Improve operational efficiency by reporting

Monitor Insight helps improve your operational efficiencies by providing transaction and system utilisation information captured through Supervisor Net. Authorised staff, with access to a Web Browser, may generate reports on any transactions managed by Supervisor Net. Reports can show daily, monthly and yearly usage for each chargeable service enabling accurate budgeting and optimisation of infrastructure.

Key Benefits

For You

- Improve operational efficiency by reporting on any transaction
- Scalability
- Filter data how you want
- Save favourite reports
- Create Close Offs for accurate accounting

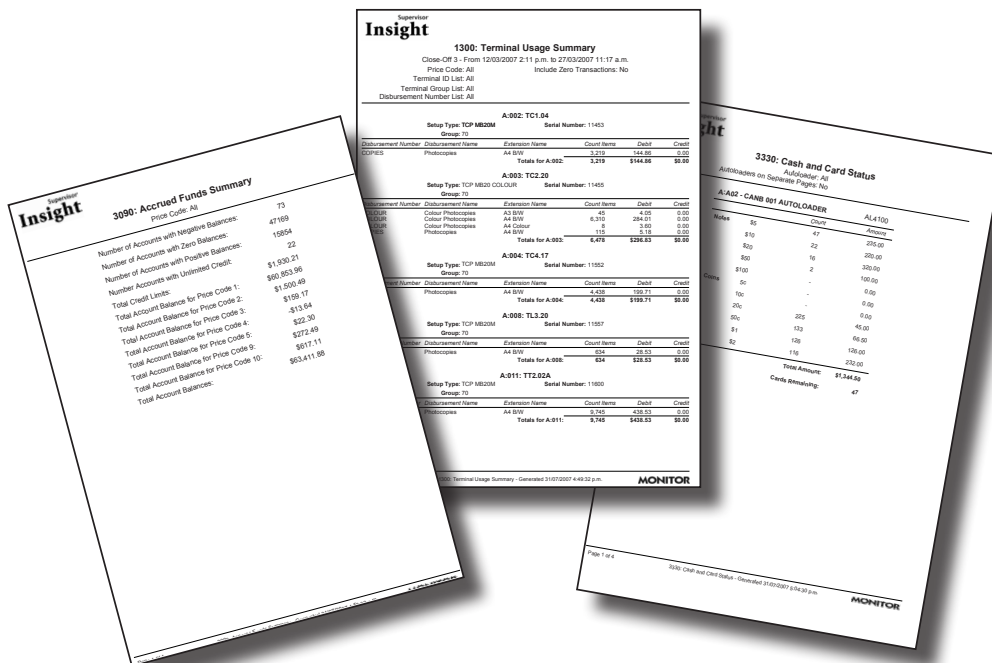

Close Offs

A Close Off creates a "reference point" which is marked in the database. Reports can be run up to, or from, this Close Off point eliminating overlaps or gaps in reported transactions common with date and time systems.

Report Filters

Reports can be created by card holder or cost centre, by transaction type, by device, by individual Monitor terminal or by a group of terminals. Reports can be filtered by date range, or by close off period and the report configuration saved for future use.

Filters can be saved for subsequent use and reports can be saved in PDF, Excel or Word format.
