Improve operational efficiency by monitoring and controlling access to chargeable services

- Reduce administration costs through centralised control and management of user accounts
- Enhance governance with full on-line transaction recording, reporting and audit trails
- Includes Print Management Solution
- Includes Copy, Fax and Scan Solution
- Includes Vending Solution
- Includes Point of Sale System
- Includes many other functions

Supervisor Net

Transaction Management System

Improve operational efficiency by monitoring and controlling access to chargeable services

Monitor the value in your system by capturing all transactions with the sophisticated Supervisor Net Transaction Management System. Supervisor Net provides a simple user interface with a comprehensive database that captures transaction data for chargeable services. These services include copying, printing, vending, laundry and many others. A multitude of reporting options are available including browser based reports. A simple user interface manages department and user accounts, cost codes, pricing, terminal and system configuration.

Key Benefits

For Users

- Cashless self-service and 24 hour access to account balance
- Greater control by tracking actual versus budgeted expenditure
- Security through PIN protection
- Account value is protected if card is lost or stolen, as no value is stored on the card
- Continuous off-line service capability during network failures
- Transaction history via browser based reports

For You

- Effective cost allocation to cost centers and users
- Credit limit management
- Secure access, user authentication and credit validation
- Centralised control of terminals
- Flexible and scalable architecture
- Easy administration through a friendly user interface
- Event monitoring, remote diagnostic and support capability
- Easily interfaces and synchronises data with third party control and accounting software
- Real-time transaction writing to third party RDBMS e.g. SQL Server, Oracle
- Accurate and real-time information assists decision making
- Integration with organisational redundancy and backup policies
- Includes Print Management solution
- Includes Copy, Fax and Scan solution
- Includes Vending solution
- Includes Point of Sale solution
- Integrates to online shopping cart
- Includes other functions and solutions as outlined in the wheel below

Flexible

Supervisor Net is the core of a modular suite of applications, which comprise the Monitor Transaction Management System. A range of optional features and modules may be purchased at any time to suit your site requirements without loss of your initial investment.

Versatile

Supervisor Net is highly featured and easily configured allowing it to be customised to suit your situation.

Dynamic

Supervisor Net allows centralised control, site management and system configuration, allowing various devices to communicate with each other across an Ethernet network. This permits the delivery of real-time transactions, device usage history, and access to remote diagnostic and support capabilities. Supervisor Net communicates real-time with Monitor terminals and other software components, so changes made to the status of accounts, prices and other system settings are immediately available throughout the system.
