Monitor and Sustainability

Ensure that environmental policies are being adhered to

Monitor's print management solution reduces costs and enforces sustainability practices

- Reduce printing wastage
- Change user behaviour
- Enforce print rules to reduce print misue
- Enhance governance with full transaction recording and reporting
- Encourage sustainability by lowering page counts

MONITOR *Sustainability*

Monitor and Sustainability

Protection of our planet is a very important aspect of Monitor's core values. For the future generations that are relying on us to do the right thing, Monitor believes that we should all be working together in a more efficient and sustainable way. Monitor is fortunate to be in an industry which can contribute so effectively to the reduction of toxic resources and the over-exploitation of natural resources. Reducing the production of all print resources is extremely beneficial both globally and at an institutional level.

Product Suite

Monitor's print management solution encourages staff to change their print habits, resulting in the organisation experiencing visible savings as well as the businesses environmental policies being adhered to, through a reduction of paper waste, toner use and on-going maintenance of print devices throughout the organisation.

Monitor Print's powerful rule engine allows organisations to create their own customised rules for staff to adhere to, such as default to black and white and double-sided printing by intelligently managing print queues. Enforcing print rules for users will reduce carbon emissions through paper misuse.

Scrutinise paper wastage, manage print costs and environmental policies with Monitor's extensive reporting suite including Supervisor Export and Supervisor Insight. With Supervisor Export, organisations can create customised reports including a comprehensive collection of graphs and charts and have them sent to specified email addresses at a time that suits.

With the Scan to Me function, staff can use the email address in their Supervisor Net account to send scanned jobs to their Inbox with the touch of a button rather than typing out their email address. This function provides an organisation with a reduction in paper and toner costs as well as a reduction in their carbon footprint.

Every tree provides enough oxygen for 3 people to breath.
Source: North Carolina Office of Waste Reduction and Recycling

Every ton of recycled paper saves about 17 trees.
Source: Purdue Research Foundation and US Environmental Protection Agency, 1996

Recycling one ton of paper saves 682.5 gallons of oil, 7,000 gallons of water, 3.3 cubic yards of landfill space.
Source: Waste Reduction is a Smart Business Decision, Onondaga Resource Recovery Agency, 1998

Recycling paper uses 60% less energy than manufacturing virgin timber paper.
Source: "1996 Statistics, Data Through 1995." American Forest and Paper Association. November 1996. Pg 2

Recycling 54kg of newspaper will save one tree.
Source: Government of Canada, Digital Collections

Recycling half the world's paper would free 20 million acres of forestland.
Source: The Recycler's Handbook, 1990
